                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Total number of hits satisfying chosen parameters:
          Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

ITISSUE SPRCIFICITY: Widely expressed in early embryos. In later embryogenesis, expression restricted to central and peripheral nervous system, liver and thymus. In adult, highest expression spleen, testis and placenta. Lower levels in intestine and musc. and very low levels in brain and liver. No expression in heart, thyroid gland, lung and kidney.

IDEVELOPMENTAL STAGE: Expressed in both adult and embryo with highest levels in early embryogenesis.

SIMILARITY: Belongs to the EZ family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            CONFLICT

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                              4051
